Beyond the Classroom: The SABIS® Edge

At SABIS® we take real-time information technology beyond the classroom, the SABIS® Edge, accelerating student growth and achievement. We enhance the traditional classroom to support a student's full educational journey, including understanding learning, personal development, career management and overall well-being.

With real-time information and self-assessment activities designed to improve performance, increase engagement, foster growth and the SABIS® Edge will help you build a comprehensive and compelling learning ecosystem.

Voice Essentials

Psychology of the Voice

Get to grips with the voice and how it works. Includes a guide to the voice.

- Discover the science of the voice
- Understand the psychology of the voice
- Find out how to improve your voice

Graphic Design

Providing Custom Quizzes

With over 22 years of experience, Course Hero instructors are:

- Degree degree holders
- Self-motivated & energetic
- Detail-oriented & patient
- Excellent at writing

Graphic design and content writing services provided

STEAM Programs

SABIS® Robotics

The Sabis® robotics program incorporates **STEM** concepts in a stimulating and fun.

Students will:

- explore computer programming, logic, and computational thinking through hands-on experiments to solve real-world problems
- enhance problem-solving, critical thinking, and

Robotics
Lesson

Course Modules

Robotics (Years 3)

- Understand program logic robotic system
- Develop robot using simple commands
- Use mechanical transformation

Robotics (Years 4) (Language Module)

- Develop program logic using advanced coding
- Use logic commands and function using logic
- Enhance robot using complex transformation

Robotics (Years 5) (Language Module 1 & 2)

- Enhance advanced robot function using function libraries
- Use logic commands and function using logic
- Enhance advanced robot function using advanced

Junior Robotics

Providing Students First Advice

Learning Objectives

1. Understand the Basics of Robotics

- Identify the components of a robot.
- Understand the basic principles of robotics.
- Apply the knowledge to a simple robot.
- Create a simple robot program.

2. Develop Problem-Solving Skills

- Identify the problem and the solution.
- Understand the basic principles of problem-solving.
- Apply the knowledge to a simple problem.
- Create a simple problem-solving program.

There is often a lot of excitement about the first steps towards robotics, which is why the first step is so important. It is the first step towards a future in robotics.
